

GSN 0606 Pharmacology for Nurse Practitioners
Prescriptive Practice for Advanced Practice Nurses
Bonus Project (5 points)
Due: 7 April 00

Objective:

Students will investigate what the Board of Nursing requires for Advanced Practice Nurses to write prescriptions in the state for which they will be practicing (or for on-site students: state of their choice).

- ❑ Does the state require documentation of specific didactic lecture material and if so , did they get this information in this course
- ❑ Does the state require the applicant to provide a written agreement outlining practice parameters?
- ❑ Is there a clinical practice requirement (i.e. the new graduate must be directly supervised for a specified number of hours – requiring co-signatures from a preceptor/licensed provider, etc.).

Directions for completion of the project:

- ❑ Distance Learning students may work together by site and submit one paper for grading.
- ❑ Distance Students are to turn the project in to their lead preceptor NLT 7 Apr 00.
- ❑ On-site students can form groups of up to 4 students and work together examining one state's requirements, but can also work individually if desired.
- ❑ On-site students are to turn the project in during class on 7 Apr 00.
- ❑ All students working in a group will receive the same group grade.
- ❑ The project should include the actual Board of Nursing documents, along with a written interpretation addressing all the above points.
- ❑ Your written interpretation should not exceed 2 typed, double-spaced pages.
